Why Was This Detected?

- User u99 triggered the detected attack sequence.
- Attack chain: LOGIN>FILE_ACCESS>PRIV_ESC>USB_CONNECT>FILE_COPY.
- All 5 required stages have supporting event IDs.
- The stages occurred in chronological order.
- Privilege escalation followed by file access, USB connection, and file copy indicates possible data exfiltration.
- Detection risk score: 92/100.

Counterfactual Analysis

Original Risk

92/100

Risk Without USB_CONNECT

41/100

Result

WATCH

Removing USB connection breaks the complete attack chain.
